

I understand that there is a petition that seeks to limit my right to receive traffic and weather reports from XM radio. I drive about three hours every day, and I travel through several different AM/FM coverage areas. XM is my only available, accurate resource for timely traffic reports regardless of where I am. I am concerned that the FCC would even attempt to limit XM's right of free speech and my right to access to information. Therefore, I would ask that you reject NAB's petition 04-160. Thank you.
